

- 5 x 40 mm dia hardened, ground straightening rolls
- Individual adjustment of the 2 upper rolls through screws
- Rolls mounted on needle bearings
- Transmission between the lower straightening rolls through pinions
- Inlet strip guide made up of 2 hardened rollers, manually adjustable

## RANGE AND FEATURES

Model	Width (mm)	Min. thickness (mm)	Max. thickness* (mm)	Quantity of rolls	Roll diameter (mm)	Weight (kg)
<b>1635 BM</b>	300	0.5	1.0	5	40	32

Straightening capacities are given for a yield point  $Re = 210$  Mpa and a tensile strength  $Rm = 350$  Mpa.

\* Max. thickness for max. width
